

After looking around many display homes and getting many prices from many different builders, we decided to go with Zuccala homes because of the flexibility with their designs.

Our home was custom designed by Zuccala homes' design & estimating team to our specifications and we are extremely happy with what they have done. We had a few ideas on design which they helped us through and suggested some other things that has made our house one of a kind.

The office staff are extremely professional, and always able to help us with any query we have had. Our site supervisor is fantastic and has kept in constant contact with us through the build.

Quality is over and above what we expected. We couldn't be happier with our choice and would recommend to anyone.
